HELLO FUTURE. WELCOME HOME.

Smart, smarter, Smart Home: Whatever tomorrow brings, WERU stands for building and living in the future. And with your new WERU aluminium front door, you are automatically part of it. With security, stability, energy efficiency and your completely individual door model, you can turn static four walls into a dynamic living environment.

▼ **A far-sighted decision.**
Anyone who wants to enjoy their new door over the long-term is best served by a manufacturer who also thinks ahead. And this is precisely our strength as a company. We are constantly developing our high-quality door systems. And offer numerous upgrade functions for every need.

▼ **And what's to come in the future?**
Artificial intelligence in doors is a far-off vision for now. With emphasis on for now. Because one thing is certain: WERU will continue to manufacture pioneering and reliable door solutions for you from innovative technologies.

▼ **Today your access to tomorrow.**
The individual finger scan and keypad – can be integrated into any ATRIS door model. Just two of many ways to make life easier in the future.

NOISY

READY FOR INDIVIDUAL REQUIREMENTS.

▼ **Design worlds.**
Doors make your life more lively. And you can set personal accents with WERU. Turn your house entrance into a meeting place with an inspiring atmosphere. Just the way you like it.

▼ **Invitingly different.**
Whether warm wood decors, stylish Black Edition, craftsmanship in glass or illuminated side lights: Be inspired by the latest WERU design highlights and decide for yourself which personal trends you want to set.

WERU

IS THERE A DOOR THAT SUITS ME? AND REALLY JUST ME?

Each WERU door is custom-made, adapted to your life, your wishes and the frame of your home and fitted with the best installation. So you can let life in.

■ I want to... upgrade my home.

Want to get your old clinker façade shining in its full glory again? Our traditional door designs enhance your entrance area, with or without handcrafted glass art.

■ I want to... live smarter.

Smart Home starts right at the front door with WERU. Thanks to innovative sensor technology, you can give your home the update you want. How about temporary accesses without a key for tradespeople, for example?

■ I want to... come home earlier.

Make yourself comfortable. Not just on the couch, but as soon as you open the door. The finger scan eliminates the annoying search for keys and the electric door opener can be used to unlock the front door at the bottom from any floor in the house.

■ I want ... modern design

without compromise.
Does your house have clear architectural lines? Then emphasize them with modern doors that blend with the façade.

■ I want ... a sustainable solution.

Generations of WERU doors are better proof of our sustainability than any standard 5-year product guarantee. This is premium for you and good for the environmental balance.

■ I want to ... protect what's important to me.

Trapped children's fingers? Not with our new Softclose technology: This takes the momentum out your door when it closes and then gently pulls it into the lock.

■ I want ... everything to be just right.

Where is there a door that can be adapted to your windows? Where the inner side of the door harmonises with the interior and you already know before installation that everything will run smoothly thanks to professional installation? Of course: at WERU.

INDIVIDUAL

SIMPLY

ONE, TWO, THREE... TO THE DESIRED DOOR.

Admittedly: The wide range of different ATRIS door models makes it difficult to decide. But we make the choice as easy as possible for you. Find your desired door in just seven steps!

ONLINE
TO THE DESIRED
DOOR

The WERU door configurator.

Simply design your desired door and experience how colours, handles or sidelights visually change a front door. Non-binding, with preview function and the option of requesting directly from specialist retailers.

➔ weru.com/configurator

7 STEPS TO
YOUR DESIRED
DOOR

01. MODEL SELECTION

Modern, traditional or with individual bars and high light incidence? Select the basic shape of your door and give it its profile by creating frames and panels flush or offset to the façade. ➔ P.68

02. DESIGN

If required, add a matching sidelight and fanlight to your desired door. ➔ P.69

03. COLOURS

Now colour comes into play: Colour with a smooth surface or haptic structure, metallic or RAL colours or finely coordinated design colour worlds. ➔ P.74

04. DECORS AND DECORATIVE ELEMENTS

Design your dream door with material decors and decorative elements made of metal or natural materials. ➔ P.76

05. GLASS ELEMENTS

Whether glass art, patterned glass or individual glass design: Anything is possible! ➔ P.77

06. HANDLES

With short or long wooden or metal handles, round, flat or embedded in the door, you have everything under control. ➔ P.70

07. EQUIPMENT

Many equipment details are already included at WERU, we offer further options and packages for even more security and convenience. ➔ P.66

FLEXIBLE

DISCOVER THE ATRIS PRINCIPLE.

There's not just one ATRIS door – but your individual ATRIS door!

With WERU ATRIS doors, you can decide for yourself what your ATRIS looks like, feels like and the functional elements you want it to have, from the basic construction to the smallest equipment detail. In mathematical terms, you can choose between hundreds of thousands of possible combinations. This sounds more complicated than it is – it is crucial that ATRIS doors adapt flexibly to your needs. And your wishes are not limited by the door. The complete flexibility in the selection of your front door is the ATRIS principle.

PLUS PACKAGES

Comfort Plus

Numerous additional options allow you to specifically increase the already existing operating comfort. Even more comfortable thanks to Comfort packages. ➔ P.80

Security Plus

With special security extras, you can increase the already high security standard of your WERU front door entirely according to your requirements. ➔ P.78

DOOR MODEL

Make your key design decision

HANDLE DESIGN

Choose from a wide range of handles

INTERIOR DECORS

Optionally adapt the design on selected models on the inside as well

COLOUR SELECTION

Discover the complete WERU colour spectrum and our textured surfaces

FRAME AND PANEL VARIANTS

Determine the depth effect of your door

DECOR MATERIALS

Decide on the desired material mix

DECORATIVE ELEMENTS

Add accents with shadow grooves and raised or flush inlays

DESIGN

Add side sidelights or fanlights as required

KICK AND SCRATCH PROTECTION

Targeted increase in the service life of your door

WHICH DOOR RANGE OFFERS THE OPTIMAL CHOICE?

Our WERU door systems incorporate the knowledge gathered over decades from hundreds of thousands of customer requests. That's why we have doors for every taste and every requirement.

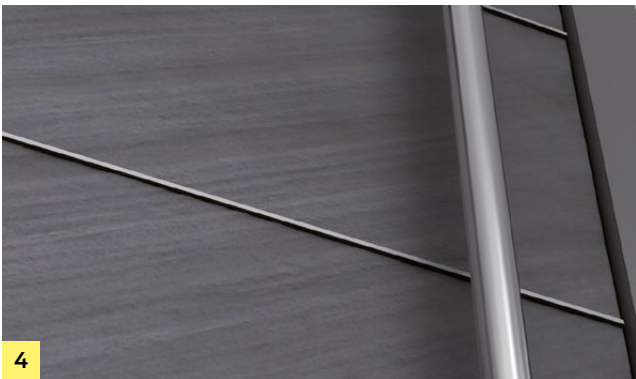

MODERN

DESIGN OR NOT AT ALL.

We keep pace with the latest trends, everything in our home is up to date: the kitchen, intelligent building technology, the media equipment. Only a front door with a clear design language is suitable for us. A front door that makes a statement that matches our overall concept and can be perfectly customised thanks to its extended design possibilities. In a nutshell, hassle-free, MODERN.

- 1| Modern architecture, combined with entrance portals in real wood look.
- 2| Subtle light with sandblasting design.
- 3| Harmonious unity. Doors with interior design.
- 4| Gives depth. Inlays give doors a special look.
- 5| Suitable for all façades: coloured aluminium front doors.
- 6| Warm wood ambience creates an exceptionally cosy look.

NEW

DECORS ON TREND.

Applications made of sandstone, slate, concrete, wood decor or panels in real wood look give your front door a particularly individual touch. Because each **decorative material is unique** – with a unique grain and feel that depends on the creation process. Through the interplay between the aluminium surface and new interesting materials, **you can set unique accents.** Our wood decors are an easy-care variant of natural materials. And four additional ceramic applications offer a modern look, combined with a highly robust surface and light resistance.

BLACK IS BEAUTIFUL!

A black front door doesn't just make an impression in Number 10 Downing Street – black front doors or black door details are almost a must-have, especially in contemporary architecture. With the WERU Black Edition, you can choose between black raised or flush inlays, as well as black outside handles, black inside handles and black rosettes to give your front door a particularly exclusive look.

YOUR TRUE FREEDOM LIES IN THE DETAILS!

At WERU, we pay attention to the bigger picture as well as the details. This also applies to the option of equipping your WERU MODERN front door with **individual door decorations** and thus designing it exactly according to your expectations. Shadow grooves, raised and flush inlays are available.

In accordance with the ATRIS principle, you are extremely flexible in your choice of colour for many models: This allows you to select various elements of the door in a different colour than the door frame. What is created? One of a kind, personal for the future owner.

Flexibility
You can recognise suitable doors by the flexibility icons.

NICE TO KNOW:

Shadow grooves, raised stainless steel inlays and flush inlays in black or Alunox visually enhance your door:

Raised inlays are narrow, raised decorative elements embedded in the door – they give the door a subtle depth.

Shadow grooves are milled into the door and give it depth and structure.

Flush inlays are wider than raised inlays and flush-mounted in the door – making them particularly easy to care for.

KLASSIK

ELEGANT,
TIMELESS,
IMAGINATIVE

A NEW TAKE ON KLASSIK.

We live in the here and now – yet also appreciate the traditions. Only a value-adding front door in traditional style is suitable for our house. With elegant and timeless shapes. With characteristic design elements such as light cut-outs or profiled decorative strips. The latest technology on the inside, with the appearance of traditional craftsmanship. With traditional finishes and handed down ornamentation. Proven, individual, KLASSIK.

1 | Harmonious duo: Traditional door design meets clinker façade. **2** | Not all handles are equal. The right selection completes the design. **3** | Large selection: Glass art changes any door. **4** | Turn your front door into a real entrance portal: Sidelights with special glass look.

STYLISH PRIVACY SCREEN.

Glass art plays a prominent role as a style and function element in traditional doors and their sidelights in particular. Fresh new structures with both modern and traditional motifs protect you from curious passers-by. And still let an adequate amount of light into the room. At WERU, you can choose between ready-made glass art, various patternend glasses and sandblast designs individually made for you.

NICE TO
KNOW:

We place the textured side of the glass in the space between the panes – the outside remains smooth and easy to clean. And if increased safety is an issue, any kind of glass art can also be produced in combination with laminated safety glass.

VARIO

Wide selection of door panels

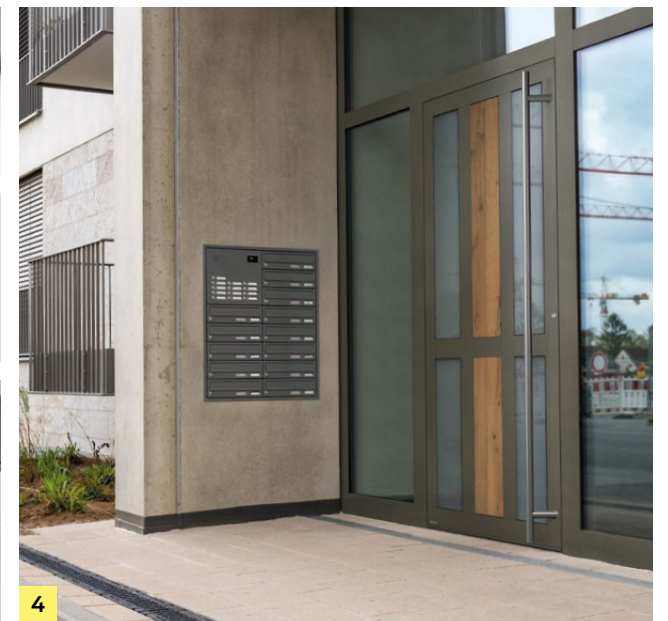

Free positioning of bars on many models – flexible light cut-outs as a result

Panels in a wide range of colours and decors possible

FLEXIBLE,
CREATIVE,
THE ATRIS PRINCIPLE

CONTRASTS MAKE THE DIFFERENCE.

We love freedom. We like it varied and individual. Whether it's a detached house, apartment block or office building – we like to create our architectural environment to be eye-catching, creative and precisely the way we want it. **A variable front door with a striking bar look is just the thing for us!** Here we can express ourselves and design the door exactly according to our wishes. And the internal values of a WERU front door are perfect too: safe, convenient, energy-efficient, VARIO.

1 | Twice as good: Front doors with real wood enhance the appearance of office buildings. **2** | Bring some life to the design: different coloured panels. **3** | Doors with integrated mailbox systems are practical and convenient. **4** | Residential and office buildings, attractively designed. **5** | Modern diversity: Variable panels make every front door a unique piece.

IS THERE A DOOR THAT OFFERS EVERYTHING WE WANT?

Each WERU door is custom-made, adapted to your life, your wishes and your home. And with variable equipment options, we make your door even more comfortable, secure and individual.

OUR STANDARD IS PREMIUM.

Do you know how much a WERU front door weighs? It easily weighs 150 kg including the frame. Why is this? Because our ATRIS front doors already come with a lot of equipment as standard. You simply choose according to the ATRIS principle and your preferences – and we will build your own individual door.

AND IF YOU ARE LOOKING FOR A LITTLE BIT MORE:

The ATRIS-life upgrade offers additional equipment at a particularly attractive package price. Of course, all of this additional equipment can also be ordered individually.

AND THAT IS ALL INCLUDED – AT NO EXTRA COST:

GLASS REBATE PANEL WITH INSTALLATION DEPTH 37 MM

Traditional design with recessed appearance between door profile and door panel

2-PANE THERMAL INSULATION GLASS

$U_g = 1.1 \text{ (W/m}^2 \text{ K)}$ with 6 mm safety glass on the outside

FRAME AND SASH

System installation depth 90 mm

SCREW-ON HINGES

Two sturdy 3-part screw-on hinges, adjustable in three dimensions

PATTERNED GLASSES

Wide selection of different door glasses, also with laminated safety glass

SECURITY

Profile cylinder with emergency and panic function, mechanically self-locking standard lock

U_d VALUE

Up to $0.84 \text{ W/(m}^2 \text{ K)}$

GLASS REBATE PANEL WITH INSTALLATION DEPTH 56 MM

Higher installation depth for even better insulation values up to $U_p = 0.52 \text{ W/(m}^2 \text{ K)}$

3-PANE THERMAL INSULATION GLASS

3-pane thermal insulation glass with Condense-Stop (model-dependent)
 $U_g = 0.6 \text{ W/(m}^2 \text{ K)}$, with 6 mm safety glass on the outside

THERMOPLUS INSULATION

Sophisticated chamber geometry of the profile system, paired with heat insulation foam, reduces thermal bridges, even in the corner area

ROLLER HINGES

Two sturdy 3-piece roller hinges, adjustable in 2 dimensions

CENTRE SEALING SYSTEM

Third sealing level guarantees maximum tightness and ensures the highest sound insulation values

ALL A QUESTION OF DESIGN.

Modern, traditional or with bars: WERU aluminium front doors offer you design freedom on all levels. This also applies to the frames and panels of the doors. Frames and panel form one unit, flush or offset looks are possible.

FRAME VERSIONS

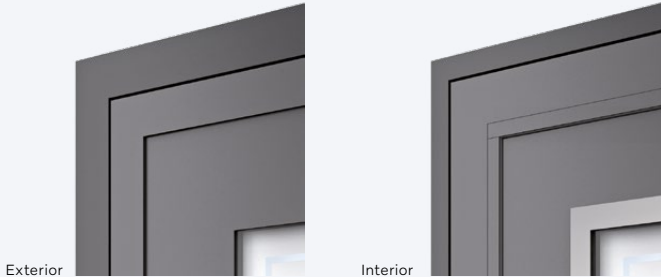

1| Flush
The frame and sash are level with each other. This ensures a straight, clear appearance.

2| Offset
The frame and sash are positioned offset. As a result, the frame on the outside protrudes visually and the door has a special depth effect.

PANEL VARIANTS

Panel variants characterise the appearance and effect of a door from the outside, as well as from the inside.

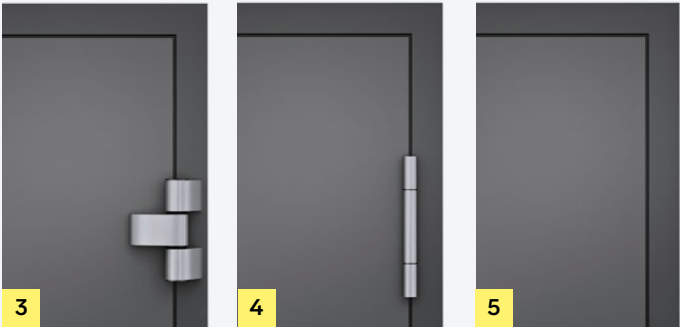

↓ Glass rebate panel
Traditional design with recessed appearance between aluminium profile and door panel.

L Flush on one side
Frame and door panel form a harmonious unit on the outside. This allows the focus to be on the modern design. The inside is designed as a glazed rebate panel.

U Flush on both sides
The high-quality exterior design is also implemented on the interior. Thus the exquisite design continues on the inside. In addition, the best thermal insulation values are achieved with this type of door design.

3| Screw-on hinge. **4|** Roller hinge. **5|** Concealed hinge.

DOOR HINGES

WERU front doors are equipped with screw-on hinges as standard. In addition, you can also select roller hinges or completely concealed hinges.

INTERIOR DESIGN

Inside and out: beautiful! Of course, you also have plenty of options for interior design to individually adapt your front door to your taste and your living situation. Some models offer similar designs both inside and outside.

Doors with interior design can be recognised by this icon.

DESIGNS

Normal front door or large portal with 3 m height, glazed fanlights, narrow or wide sidelights – WERU has a lot to offer.

No door is complete without fittings. When choosing outside handles, inside handles and matching rosettes, three aspects are key: Design, security and comfort.

The selected outside handle not only determines the visual effect of your front door: When touched,

the value and stability of the WERU outside handle is revealed in an instant. Depending on the selected door model, WERU offers a large selection of handles for individualising your front door: shorter standard handles or outsidehandles that set additional design highlights, or handles with a particularly high quality feel. You have the choice!

SECURITY.

OUTSIDE ROSETTES

Whether drill-in round rosette or surface-mounted rosette: WERU rosettes are always secure – your taste alone determines the shape. Uninvited guests stay outside with so-called cylinder protection rosettes. They prevent the cylinder from being pulled out or drilled.

INTERIOR HANDLE

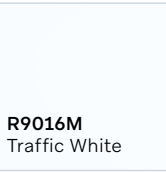

Outside wow – and inside? Likewise! A large selection of interior handles is already included in the standard equipment of your WERU aluminium front door. Simply choose your favourite design!

* Denotes functional handles, modern and traditional.
** Stands for selected long handles over almost the entire front door height as a design element, as well as selected short handles.
*** Fulfills your desire for a unique entrance door experience with applications and the highest quality materials.
Standard Standard equipment.

THE AMAZING EFFECT OF COLOUR!

We put a lot of thought into the interior design of our homes. Now your colour considerations can include the entrance door of your home as well. There are almost no limits to your imagination: You can design frames and panels in different colours, continue the colour design from the outside on the inside of your front door or adapt the design of the inside of your front door to your interior.

RAL COLOURS +

For example, choose from the approximately 200 non-metallic colours in the RAL Classic colour fan.

FEEL-GOOD COLOURS ++

Choose one of the 21 matt texture colours with its special surface feel.

METALLIC COLOURS +++

Our 13 metallic colours give your door a particularly high-quality look – iron glitter in the colours creates very special lighting effects.

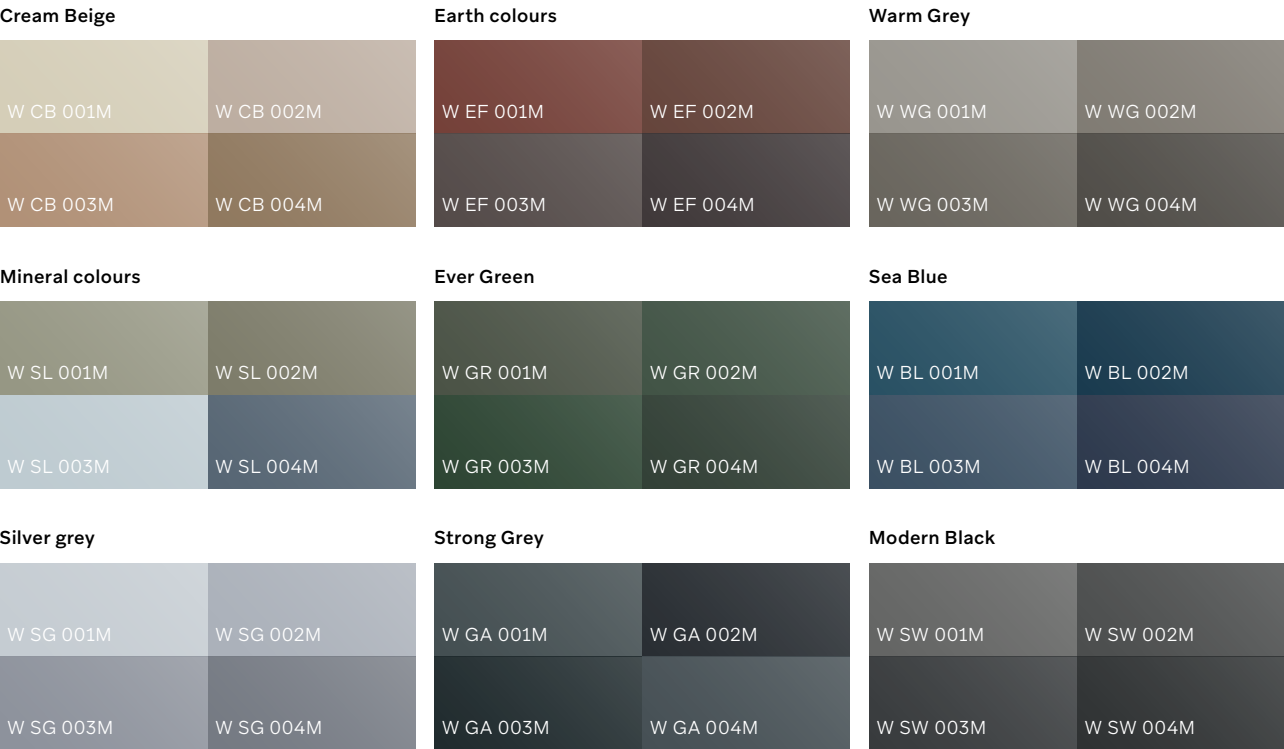

TIP

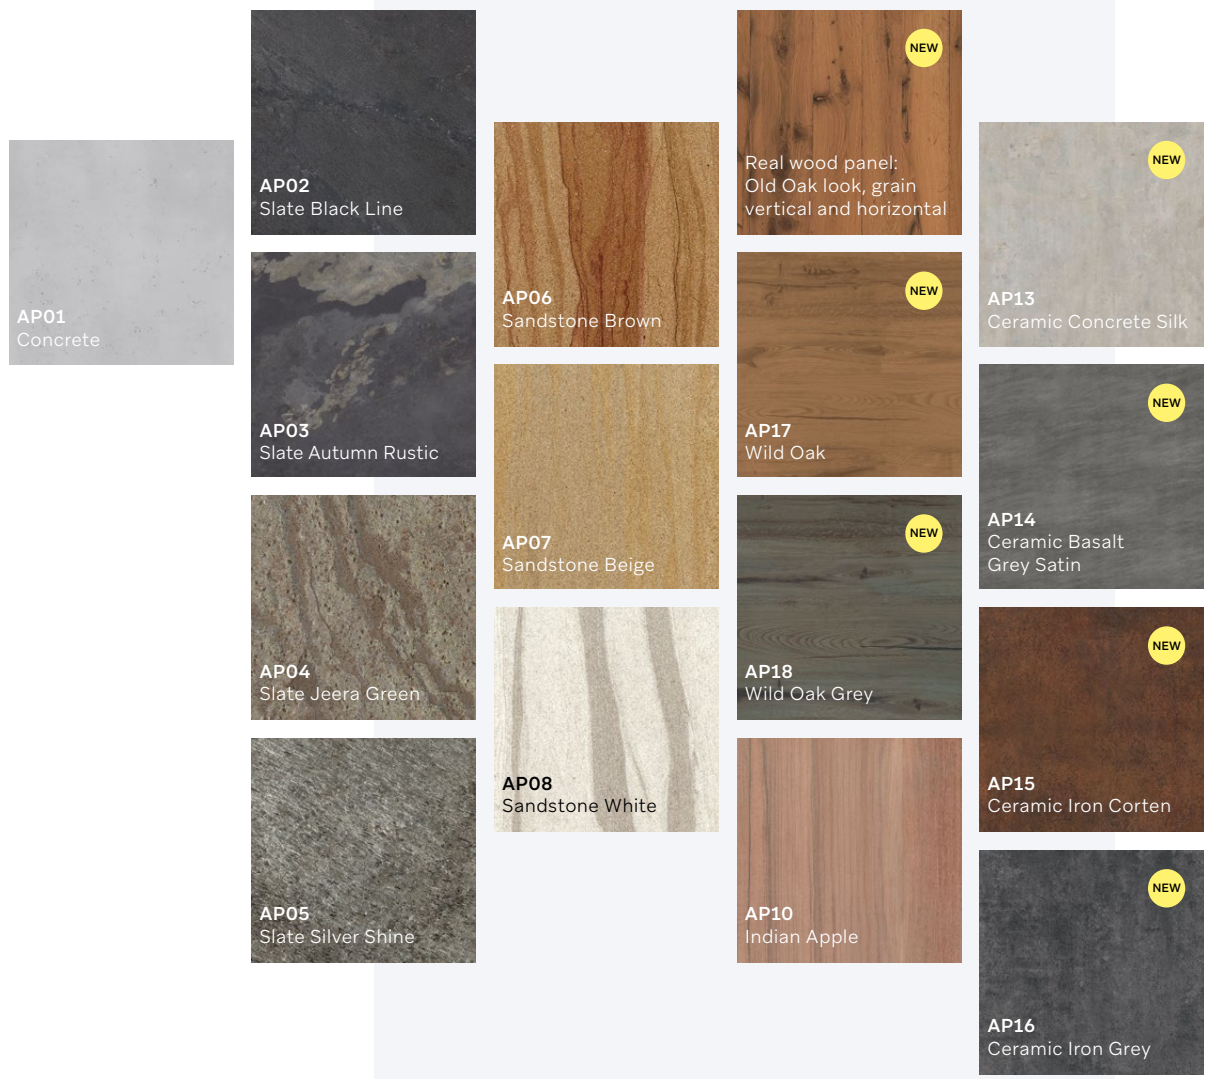

You can easily try out the effect of different colours in our door configurator:

weru.com/configurator

DESIGN COLOUR WORLDS +++

With the finely coordinated design colour worlds we have developed, you have even more options for presenting the individual character of your home. For example, with different colours in the panel and frame.

YOU HAVE THE CHOICE: DECORATIVE MATERIALS.

In order to design your individual front door, you can choose not only high-quality aluminium surfaces in countless colours and glass, but also other highly interesting and unusual materials. Please ask your specialist dealer for sample boards to view our decorative materials.

Fully solid door models cannot be realised in all decorative materials due to the limited dimensions of the raw material.

INDIVIDUALITY, MADE TRANSPARENT.

Glass art, patterned glass or your own design – we can do almost anything: Simply send us your favourite motif and our experienced craftsmen will transfer it into the glass!

- 1| Sidelight glass art matching the door design. 2| Glass art with LED lighting. 3| Glass art "frost pattern". 4| Sandblast-glass art in floral look.

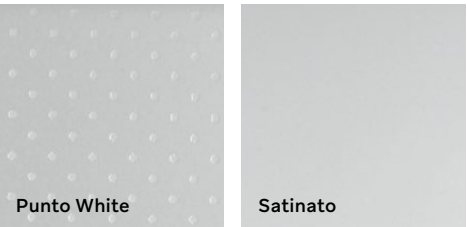

PATTERNED GLASS

TIP

You can find the entire selection of patterned glasses at your local dealer and in our door configurator.

weru.com/configurator

BETTER SAFE THAN SORRY.

Unfortunately, a front door can also be the target of uninvited guests. WERU front doors make life difficult for burglars, however. Our security packages offer additional protection.

INCREASING THE SAFETY CLASS (RC = RESISTANCE CLASS)

- RC 1** The components of the door have basic protection: against breaking open attempts with physical force such as kicking, jumping against the door, hitting the door with the shoulder, pushing up and pulling out.
- RC 2** This resistance class provides standard security and is recommended by the police. Your door can withstand the break-in attempt for at least 3 minutes.

YOUR PACKAGES FOR INCREASED SECURITY.

Whether as standard, individually purchased or as part of a package: WERU front doors offer security for every requirement.

	Protect *	Protect **	Protect ***	
•	•	•	•	AutoLock Plus
•	•	•	•	Leverage-proof guards
•	-	-	-	Security rosette
-	•	•	•	Security cylinder
-	-	•	•	Impact-resistant P4A glazing

NICE TO KNOW:

Top security
All WERU front doors can be upgraded to security class RC 2.

- 1| AutoLock Plus**
Simply close your door – three latch bolts secure the door even without locking.
- 2| Leverage-proof guards**
Wedges and drilling cams attached to the frame and sash rebate interlock when the door is closed, thus preventing the door leaf from being forcibly levered out in the hinge area.
- 3| Security rosette**
The security rosette with cylinder cover protects the cylinder against drilling and core extraction and prevents the rosette from being levered off or unscrewed.
- 4| Security cylinder**
The multi-pin reversible key profile cylinder with steel-hardened security pins has restricted locking – i.e. the locking only exists once. The integrated core protection disc helps to prevent drilling open. Unauthorised key copies are not possible. Keys may only be copied with the security card.
- 5| Knob cylinder**
No key remains inside here. With a rotary knob on the inside of the door, it can be opened or locked from the inside at any time, without a key at all. This provides more security and saves valuable seconds in an emergency.
- 6| TwinLock**
With the TwinLock door catcher, you first open the door by just a gap. Nobody can enter, but you can look out from the inside. All lock components are concealed in the door profiles.
- 7| Swivel hooks**
The swivel hooks prevent the frame and sash from being pressed apart, sawing or bending the bolt is almost impossible.
- 8| Penetration-resistant P4A glazing**
The laminated safety glass with safety film between the panes makes it difficult to break the front door glass.
- 9| 5-bolt lock**
The 5-bolt lock with solid and swivel hooks made of hardened steel further increases the resistance of the door.
- 10| Digital door spy**
The digital door spy shows you on a screen what is happening outside in front of the door – in a comfortable size and distortion-free.

SIMPLY MORE COMFORT.

WERU front doors made of aluminium are extensively equipped by the company. Our standard is already premium. But there are hardly any limits to the individualisation options, including with the additional comfort equipment – whether as a package or an individually selectable option.

1| Door closer

Fully loaded with shopping, closing the front door can easily become an acrobatic exercise. Our door closing unit takes care of closing the door for you. Comfortable, gentle and safe.

2| Finger scan or keypad

You can literally forget your door keys or cards: Use the finger scanning unit or the keypad to open your front door conveniently using your fingerprint or code.

YOUR PACKAGES FOR INCREASED COMFORT.

Comfort +	Comfort ++	Comfort +++	
•	-	-	3-bolt lock
•	•	•	Electric door opener
-	•	•	AutoLock
-	-	•	Finger scan unit

3| AutoLock Plus with electric door opener

Our front doors are already equipped as standard so that the door is locked automatically with two latch bolts when pulled shut – no need to lock. AutoLock Plus locks the door with three latch bolts. And with the electric door opener, the extended latch bolts are retracted via a motor.

4| Letterboxes

With our robust front plates made of galvanised, powder-coated steel, you can also integrate letterboxes and bells in the sidelight of our front doors. The metal bell buttons are flush-mounted in the steel front and can be fitted with individual aluminium name plates on request.

5| Kick plate*

We have all experienced it: When both hands are full, we open the door with tip of the shoe. The stainless steel kick plate helps to prevent inevitable and unsightly scratches in the door paint. It is installed flush or surface-mounted, depending on the selected door model.

6| Scratch protection*

When unlocking the door, the bunch of keys often strikes the front door and leaves clearly visible marks over time. Our stainless steel anti-scratch protection around the profile cylinder is easy to attach and protects the panel from unsightly marks.

* The installation depends on the door model. Applications and decors can rule out kick and scratch protection.

WHO CAN GUARANTEE MY SATISFACTION?

At WERU, we are not just proud of what we produce. We want this quality to arrive at your location and ensure that it does. Together with our specialist dealers and the best installation quality. So you can let life in.

**SPECIALIST
DEALERS IN GERMANY
AND EUROPE**

ONLY LEARNED IS LEARNED!

We are there wherever you need us: With around 800 selected specialist dealers in Germany and Europe, you will find the people who know everything about WERU doors and windows. They take the time to help you make the right decisions. The people who have competent answers to all your questions. After they have taken the dimensions of your house and planned doors and windows together with you, they give production the green light and just a few weeks later they install your doors and windows professionally, quickly and cleanly.

weru
AUTHORISED
SPECIALIST DEALER

THE WERU GROUP.

The WERU Group is a leading manufacturer of windows and doors in Germany and Europe. We produce our windows and doors at several German production sites.

**QUALITÄT MADE
IN GERMANY**

Hardly any other manufacturer offers a comparable professional complete package that leaves nothing to be desired. And we are not resting on our 175-year history. We are continuously working on improving and developing our products. Because our corporate vision focuses first and foremost on customer satisfaction – for a lifetime.

COMPETENCE, INNOVATION AND INDIVIDUALITY.

WERU doors and windows allow you to purchase the best quality products – manufactured to last as long as possible. Because you don't buy doors and windows every few years, but for decades. Thermal and sound insulation, burglary resistance and contemporary designs are a matter of course for us and therefore also for you.
